Art Unit: 3732

DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 41-43 and 45-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Recitation of "said slide", "said leading edge", and "said insert" lack sufficient antecedent basis.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 45-47 are rejected as understood, under 35 U.S.C. 102(e) as being anticipated by Kelly et al. (6,325,622). Kelly et al. disclose a self-ligating orthodontic bracket comprising a bracket body 22 configured to be mounted to the tooth of non-metallic material and including an archwire slot 30 and a metallic ligating member 24 carried by the body (column 9 line 38, column 8 line 55). The non-metallic material is a polymer or polycrystalline aluminum oxide (column 9 line 41).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claim 48 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kelly et al. in view of Reher et al. Kelly et al. disclose a bracket that shows the limitations as described above; however, they do not show an insert. Reher et al. teach an orthodontic bracket comprising an insert 14 coupled with the bracket body 12 and bounding the archwire slot. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the bracket of Kelly et al. with the insert of Reher et al. in order to strengthen the archwire slot in view of Reher et al.

Allowable Subject Matter

- 7. Claims 28-40 and 44 are allowed.
- 8. Claims 41-43 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

9. Applicant's arguments with respect to claim have been considered but are moot in view of the new ground(s) of rejection.
